- Folding design that fits a jacket pocket or camera bag
- Gesture and face tracking to keep the subject centred
- Built-in battery that also charges your phone
- Tripod thread in the base for static shots

Warranty

- 12 month manufacturer warranty.

Frequently asked questions

Will it hold a large phone with a case?

Yes, the clamp takes phones up to roughly 88mm wide. Very thick cases or heavy magnetic wallets should come off first.

Do I need to balance it before use?

Slide the phone in the clamp until it sits level before powering on. It takes about ten seconds and makes a visible difference to battery life and smoothness.

Does it work with the native camera app?

Yes for stabilisation. Tracking and gesture control need the Baseus companion app.
