- Shares one mobile connection across the household
- Works anywhere with mobile coverage — no fixed line needed
- Compact desktop unit, plug in and go
- Wired LAN ports alongside wifi

Warranty

- 6 month seller warranty.

Frequently asked questions

Which SIM should I use?

Any Bangladeshi data SIM works. Compare monthly data packages — a router will use far more data than a phone.

How many devices can connect?

Up to 32 wifi clients, though realistic performance is best under about ten active devices.

Can I use it while travelling?

Yes, as long as there is mains power and mobile coverage.
