- Exynos 1580 with 8GB RAM — comfortable headroom for heavy multitasking and gaming
- 50MP OIS main camera — optical stabilisation keeps night shots and handheld video clean
- 5000mAh with 45W fast charging — a full day of use, topped up over a coffee
- IP67 rated — sealed against Dhaka's monsoon and everyday dust

Warranty

- 12 month manufacturer warranty.

Frequently asked questions

Does the Galaxy A56 support 5G on Bangladeshi networks?

Yes. The A56 supports the sub-6GHz 5G bands used by Grameenphone, Robi and Banglalink. It falls back to 4G LTE automatically where 5G has not rolled out yet.

Is a charger included in the box?

No. Samsung ships the A56 with a USB-C cable only. Any USB-PD charger works; a 45W adapter is needed to hit the advertised fast-charge speed.

Can I use two SIMs and a memory card at the same time?

The A56 has a hybrid tray — two nano-SIMs, or one SIM plus a microSD. With 256GB of onboard storage most buyers run dual SIM.

Is the phone waterproof?

It is IP67 rated: protected against dust and against immersion in one metre of fresh water for up to 30 minutes. Water damage is not covered by warranty.
