- 6.74" HD+ 90Hz display with a 625-nit panel
- Dedicated microSD slot alongside both SIMs

Warranty

- 12 month manufacturer warranty.

Frequently asked questions

Can I expand the storage?

Yes. The Note 60x has a dedicated microSD slot, so you can run two SIMs and a memory card at the same time — no trade-off.

Does it support fast charging?

It ships with a standard charger and supports 15W wired charging. A full charge takes roughly two hours.

Is it really water resistant?

IP54 means splash and dust resistant, not waterproof. It will survive rain and spills; it will not survive being dropped in water.
